

i) Challenges

Currently the school experiences the following challenges.

1. Unequipped science laboratories, library, computer room and dining hall.
2. The dining hall and kitchen are too small and ill-furnished and equipped.
3. Understaffing in the teaching staff.
4. Low rate of fee payment due to poverty of most of the local parents.
5. Delays in Government remittance of FDSE funds, as well as shortages in the expected amounts.
6. High rate of drop outs, due to truancy and teenage pregnancy
7. Lack of staff houses and boarding facilities.
8. No land for future expansion, especially establishment of boarding wing and playgrounds.

Way forward: The boarding Dream

The dream of a boarding school is still elusive because neighbors with space have remained reluctant to release land that can be used to establish a boarding section.

A boarding section will increase students' school contact hours and reduce their interactions with academic distractors.

The end result will be better academic performance of our students leading to more of them transiting to institutions of higher learning.
